RESUME

Pragyan Paramita Mohanty
Email : pragyan2006@gmail.com
Mobile: +65-85955429
Location: Singapore
Work Permit : DP (G5491319U)

EXPERIENCE SUMMARY:

5+ years of experience overall IT experience in web based, windows & mobile applications.

Work Experience -

AGILITICS	Sep 2017 – Till Date
ASPIRE SYSTEMS	Mar 2012 – Aug 2013
DATAMATICS Global Services Ltd.	Jul 2010 – Nov 2011
CMC Private Ltd	Dec 2007 – Jun 2010

TECHNOLOGIES WORKED ON:

Programming Languages	NodeJs, Bootstrap, Jquery, VB.Net, C#.Net, ASP.Net, ADO.Net, WPF,
Databases	MongoDB, Oracle 9i/10G, TOAD 7.2,SQL Server,
Microsoft Technologies	ASP.NET 1.1/3.5, VB.NET, .Net Framework v1.1/3.5,C#.NET

MY WORK INCLUDES:

- Requirement Gathering
- Designing of Web Based & WinForms.
- Development of Web Based Application Using **NodeJs**
- Development of Web Based Application Using **ASP.NET 2003/2008**
- Worked in NoSQL databases like **MongoDB**
- Host the application in **AWS LightSail**
- Development of Windows Application Using **C#.Net**
- Merging Code across multiple versions of the Application in VSS
- Experience in working on **RDBMS** using **Oracle 9i/10G,SQL Server**
- Developed **Procedures, Functions, Triggers, Cursors** in PL/SQL
- Maintain the application version in **GitHub**

QUALIFICATION:

Master In Computer Application	BPUT, India	2007
Bachelor in Computer Science	Utkal University, India	2004

PERSONAL DETAILS

Date of Birth   : 30th March 1984
Work Permit   : DP (G5491319U)

PROJECT SUMMARY

PROJECT#1 - SafeLanes Management System , Dec 2017 to till date
ROLE   **: Software Developer**
TECHNOLOGY   **: Node Js, Bootstrap, Jquery, MongoDB**

DESCRIPTION:
About Safe Lanes - Safe Lanes provides Marine Quality Assurance services across Shipping and Terminal operations. SafeLanes does assessment of Tanker and Offshore Safety Management System; appraisal of Marine Terminal Management Systems; preparation for ISO accreditation; undertaking of vessel audits/assessment including those for Navigation.

The project is a web application hosted in AWS cloud to maintain internal employees information, client information and Job assignment.
- **Employee module -** Add/update information of Safelanes employee along with additional information about Family, VISA & Insurance etc
- **Client Module -** Add/update information of partners Safe Lanes& their Sales Executives.
- **Job assignment -** An Employee can pick the task of his choice/skill (Audit, consulting, Inspection). One can update the progress of the task.
- **Observation module -** A manager can view the progress of the task. Manager can track how many asks are still unassigned, also can react if certain task is at risk of not meeting SLA.

Roles & Responsibilities:

- Requirement Gathering.
- Design & Develop UI as per the requirement
- Construction of Business Logics (Node JS, Bootstap Jquery, EJS)
- Design the database (Mongo DB).
- Host in AWS cloud

PROJECT#2 - Agilitics , Sep 2017 to Nov 2017
ROLE   **: Software Developer**
TECHNOLOGY   **: Visual Studio. NET 3.5, C#, ADO.NET,SQL Server**

DESCRIPTION:
Enhancing the existing web application of Agilitics. Added a new module where professionals can buy the courses and make payment. After buying the course, they can choose available slots and enroll into the course.

Roles & Responsibilities:

- Creating the Business Logics of this modeule.
- According to the requirement prepare the UI (User Interface).
- Test existing application to see the effect of new changes in existing.
- Design the database.

PROJECT#3 - Global Scholar(Pinnacle Suite), Mar 2012 to May 2013
ROLE   **: Software Developer**
TECHNOLOGY   **: Visual Studio. NET 3.5, C#, ADO.NET,Oracle**

DESCRIPTION:
GlobalScholar.com is an online education platform where parents and students can connect with tutors. The platform could also be used by schools and school districts to enable teachers and administrators to create manage assessments, standards ,curriculums and supplement learning. The company also launched two websites. SchoolFinder pulled together relevant information for elementary and high schools and let parents compare one school against another. CollegeFinder did the same for colleges.

Roles & Responsibilities:

- Creating the Business Logics.
- According to the requirement develop applications using ASP.NET.
- Preparing Oracle packages.
- Preparing test cases

PROJECT#4 - MFUND, Jan 2011 to Nov 2011
ROLE   **: Software Developer**
TECHNOLOGY   **: Visual Studio. NET 3.5, VB.Net,ADO.NET, C#, WPF, Oracle**

DESCRIPTION:
Mfund is an application to cater to the needs of recording SALE/PURCHASE/SIP/SWICHOVER/ MASTER CHANGE and OTHER MISCELLANEOUS service requests. The purpose of the project is to create a competitive new product to support all mutual fund processing features like Validation & Updating service requests, Dividend processing, Brokerage processing, Refund etc and also advanced querying.

Roles & Responsibilities:
- Creating the Business Logics.
- According to the requirement develop applications using ASP.NET.
- Preparing Oracle packages.
- Preparing technical documentation as per business documents prepared by Business Analyst.

PROJECT#5 - VMNIS, July 2010 to Dec 2010
ROLE   **: Software Developer**
TECHNOLOGY   **: Visual Studio.NET 3.5, C#.Net,ADO.NET Ajax, Oracle**

DESCRIPTION:
The Vitamin and Mineral Nutrition Information System (VMNIS) is a simple, robust and "user-friendly" web-based application where the organization like WHO can track and to assess the micronutrient status of populations, monitor and evaluate the impact of strategies for the

prevention and control of micronutrient malnutrition, and to track related trends over time. Due to this, Member States will be provided with up-to-date national, regional, and global assessment of the magnitude of micronutrient deficiencies and with technical support to increase their capacity to establish and maintain surveillance of micronutrient status at the national level.

Roles & Responsibilities:
- Requirement Gathering for Development.
- Creating the Business Logics.
- According to the requirement develop applications using ASP.NET.
- Writing the stored procedure, functions according to the requirement.
- Preparing test case and reviewing code.

PROJECT#6 - ICICI Lombard General Insurance, April 2008 to June 2010
ROLE   **: Developer and Tester**
TECHNOLOGY   **: Visual Studio.NET, ASP.NET, ADO.NET,VB.Net, PL/SQL Oracle 9i**

DESCRIPTION:
Genisys Configurator is a suite of components that satisfies the need of a comprehensive insurance system. The tool is made, based on middle tier architecture. Configurator has been developed as a product, with its entire suite of components serving the comprehensive need of a typical insurance organization or as individual component catering to specific organizational needs. These configurator components can be easily ported to platforms of choice and or customized to suit as the specific business purposes and rules of an insurance organization. Configurator has a product definition engine component that allows the user to rapidly define new insurance products, make changes to existing Components, establish to rules that govern these products behavior. Thinking in mind of the detariffing scenario in the insurance business field, this product is made to give full flexibility on the detariffing environment

Roles & Responsibilities
- Requirement Gathering for Development.
- Drafting Business Logics for Accounting.
- Provide technical & domain Support.
- Writing the stored procedure, functions according to the requirement and performance tuning accordingly.
- Preparing test case and reviewing code.
- Identifying, analyzing defects and in-consistencies in software program functions, outputs, online screens and content.
- Handling Post Live Tracker and providing online solutions.
